

WILLIAN FERREIRA ZENI

Process & Data Automation Analyst | Power Platform

Farroupilha, RS, Brazil · Contact: willianf.zeni@gmail.com | +55 (54) 99158-0442 | [GitHub/zenvv](https://github.com/zenvv) | [LinkedIn/willianzeni](https://www.linkedin.com/in/willianzeni) | zenvv.dev

PROFESSIONAL SUMMARY

Process automation and **data analysis** in an industrial environment. Reduced the invoice processing cycle from *6 hours to 15 minutes*, reduced risk analysis issuance from *1.5 hours to 10–15 minutes*, and designed a production planning and control (PCP) system from scratch for a metalworking company, now used daily by 30+ operators. Experienced with **Power Platform**, **SharePoint/Graph API**, **SQL**, and **Python**, with full-stack development using **Next.js/React/TypeScript** when solutions go beyond low-code. Fluent in English.

PROFESSIONAL EXPERIENCE

Software & Automation Developer (Contractor) | Metalúrgica Bello Aramados | Oct 2025 – Sep 2026

(Part-time collaboration through Feb 2026; full-time from Mar 2026 to Sep 2026)

- Designed the company's **production planning and control (PCP) logic from scratch**, including FIFO queues and the Order → Production Order → Queue workflow, for a process that previously had no formal control. Translated this logic into a shop-floor application used daily by **30+ shop-floor operators with varying levels of technical proficiency**.
- Developed **8+ Power Apps applications** and **10+ Power Automate flows** for production database updates.
- Architected and developed the **SGE**, consolidating four areas previously managed through isolated spreadsheets. Reduced production order creation time from **approximately 30–45 minutes to near-instantaneous processing** and implemented end-to-end traceability across Purchasing → Finance and Logistics → Finance, previously unavailable. Implemented granular **role-based access control (RBAC)** by department and role, along with audit logs and notifications.
- Completely refactored the company's legacy [institutional website](#) (**PHP, jQuery, MySQL, CSS**), implementing full responsiveness, vulnerability fixes, and security layers for the contact form.

Junior Data Intelligence Analyst | Centro Tecnológico Randon Ltda. | Jan 2025 – Feb 2026

- Developed **Power Platform applications** for operations, accounting, safety, test engineering, logistics, inventory, and access control.
- Created an **operational revenue forecasting system** using Excel, MS Fabric, Power BI, and Power Automate, adopted as a reference by Operations, Sales, and Accounting teams.
- Designed **ETL pipelines and Power BI dashboards**; automated data extraction from the SAP ERP using Python (**Pandas, OpenPyXL, NumPy, PyAutoGUI**).
- Designed and structured several business controls from scratch, including maintenance controls and processes for the Tax and Purchasing departments.
- Served as a **key user** during the implementation of Randoncorp's internal AI initiative (**BRAIN Project**) within my business unit.

Administrative Assistant | Centro Tecnológico Randon Ltda. | Jun 2023 – Jan 2025

- Operated the **SAP ERP** and automated internal processes using Power Automate, MS Forms, SharePoint Lists, and Excel.

Intern | Centro Tecnológico Randon Ltda. | Nov 2022 – Jun 2023

- Supported initial administrative operations using the **SAP ERP**.

SELECTED PROJECTS

Risk Analysis Digitization — Power Apps | *Centro Tecnológico Randon*: Reduced the approval and issuance process for Test Risk Analyses from **1.5 hours to 10–15 minutes** by digitizing the workflow. The solution currently supports **40–50 analyses per month**.

[Read more](#)

Operational Control App — Power Apps | *Metalúrgica Bello Aramados*: Production reporting application used by **30+ shop-floor operators**, featuring machine-based FIFO queues, parameterized inspections, and audit logging.

[Read more](#)

Invoice & Transportation Declaration Automation | *Centro Tecnológico Randon*: Reduced the invoice receiving and transportation declaration process from **6 hours to 15 minutes** by automating the workflow with **MS Forms, SharePoint Lists, and Power Automate**, while implementing end-to-end file and process traceability where none previously existed.

[Read more](#)

SGE — Internal Management System | *Metalúrgica Bello Aramados*: (Next.js, React 19, TypeScript, TanStack, TailwindCSS, MS Graph API/MSAL) Internal management platform consolidating **Production Planning & Control, Sales, Purchasing, and Finance** into a single system. See the Professional Experience section for impact details.

EDUCATION

Technology Degree in Systems Analysis and Development

Instituto Federal do Rio Grande do Sul - Farroupilha Campus | May 2022 – Present (Expected graduation: Dec 2027)

SKILLS

- Microsoft 365 & Power Platform**: Power Apps, Power Automate, Power BI, Microsoft Fabric, Microsoft Entra ID (Azure AD), MSAL, M365 Administration
- Data & Integration**: SQL, MySQL, PostgreSQL, Python (Pandas, OpenPyXL, NumPy), Microsoft Graph API, SharePoint Lists, SAP ERP/HANA
- Development**: HTML/CSS, JavaScript, TypeScript, React, Next.js, PHP, CodeIgniter
- Tools**: Git, GitHub, Microsoft Excel (Advanced), Vercel
- Design**: Adobe Photoshop, Adobe Illustrator, Figma, Canva
- Languages**: Portuguese (native), English (fluent)
